**TIMELY TOPICS**

A GREAT INVASION

Seven trains of twelve cars each, conveying a total of 4,200 passengers, all farm laborers, are on their way west from Eastern Canada to assist in harvesting one of the greatest harvests Canada has ever seen. The men are coming from all parts of Nova Scotia, New Brunswick and Prince Edward Island. In addition to that great host Quebec is sending trains containing 2,600 laborers to this western country. The total number that is expected to be sent west altogether for the harvest is about 50,000. It must be remembered that a great number of those who come for harvest remain in the western country. This year the invasion will undoubtedly be the greatest ever known.

Welcome to these invaders. May they bend their backs with right good will and do good work toward harvesting the golden grain. May they also assist in removing the bad name which harvesters in the past have left behind them.

HELP FOR THE FARMS

Negotiations are in progress toward securing large numbers of English lads between the ages of 14 and 20 for our Canadian farms. These lads will all be graduates from high schools, and it is expected that thousands will be assisted to this country yearly. This scheme should be good, both for the lads and also the country. It appears that these lads will be of good character and far superior to lads which have hitherto been sent over from various homes. It is hoped that these lads will be settled with farmers who will have both patience and sense to understand that they will be material from which can be made the very best of farmers which this country needs.

We can only wish success to the venture. Other Europeans may sometimes turn out good countrymen and citizens, but there is no doubt it is one of the greatest needs of this country in the days to come is men of British blood, with British ideals and good strong sense of British laws and justice. At present the foreign element is increasing to an alarming extent in some districts, to the detriment of good law and order. The above influx ought to result presently in a higher tone being put into Canadian citizenship.

BRITAIN'S FUTURE PROSPECTS

According to the Manitoba Free Press a wave of cheerful optimism is now beginning to sweep over England. For a long time the mother country has been under clouds and strikes, rumors of wars, dissensions among politicians, and other perplexing problems have made the life of England's great men somewhat burdensome. But now the horizon is clearing, the clouds are passing away, and it seems as

though hopefulness is dawning. The laboring people are being recognized as possessing—rights more than of yore.

France and Russia have again strengthened the bonds of unity, and with Great Britain, not forgetting Canada, are able to keep the peace of Europe. It is generally recognized that Britain is enormously wealthy, and if these war clouds will only pass away and allow the huge surpluses of money to be placed in right channels the working men and rich men alike will become more satisfied than ever.

ALBERTA AND NEW ROADS

The Hon. C. R. Mitchell, minister of public works, has, we understand, lately been touring Alberta, inspecting roads at first hand and generally deciding where that million dollars promised by Premier Sifton is to be spent. He travelled from Calgary to Medicine by automobile, where a new high road is already in progress, and according to the Free Press he located new sites for traffic bridges at Okotoks and Higa River. We can quite understand how the need of the latter place would appeal to him, especially if he travelled south from High River to Cayley after rain. He is the man that is able to level some of our steep grades, and drain off some of the mud holes by a flash of his pen, so to speak.

Good roads are a vital necessity, and the government cannot put its money to a better use than on the improvement of our roads. We did more power to the aim of those who are striving for their improvement.

**Live Stock Must be Clean to be Healthy**

If it pays to keep a mare, a cow, a sow, or a ewe to produce young certainly it pays to add the little expense or trouble necessary to give her a fair chance to rear her young. Too often the mare or cow must bring her young in filthy stables or lots. Many a calf dies with scours, and colts die with inflamed joints that the owners attribute to "just my bad luck," when the trouble is filth—infection through the navel cord, the result of being dropped in a filthy stable.

During the past winter, with our continuous rainy season, the barn lots were in terrible condition and in many cases the stables have been little better. There is no need of these conditions being quite so bad. In the first place, the live stock ought not to be allowed to run all around the barn and tramp the ground into the condition that usually exists in a wet spell. Surely one side of the barn, at least, can be kept in condition to be approached without danger of floundering in the mud.

Stalls can also be kept dry and clean, even if the floors are of dirt; but it requires drainage and that the floors be raised above the surrounding soil.

Some people seem to think that the motto, "Cleanliness is next to Godliness," does not apply to their domestic animals. Filth is as destructive to good health and good work among our farm animals as when applied to man.

Fall wheat harvest is now in full swing.

## SAMPLE MARKET

## FOR GRAIN

How it Will Work Among the Best Interests of the Farmers of the Canadian Northwest

The efforts of the dealers in wheat and other grains to establish a sample market in Winnipeg are being made by men who desire and who appear to be determined to regain the control of the grain trade they held for many years, but which they now have lost. Such men, however, this grain moving principle that governs all the steps they are now taking. Let us examine the true in wisdom of the matter.

There are only about twenty-seven days from now the crop commences to move. In the fall of the year, until the close of navigation at the head of the Lakes. The grain crop of Western Canada is taken from Port William and shipped across the Great Lakes by boat to the eastern markets. After the close of navigation the grain goes across the Lakes by boat nearly necessarily so for rail routes to the Atlantic ports either around the north shore of Lake Superior or through the United States.

Under the proposed system of sampling, every carload of grain passing through Winnipeg on all the different lines of railway will be subject to a wait of twenty-four hours except Sundays and holidays when the wait will be twice that long.

The plan of those in favor of a sample market is to have a sample of grain arrive in Winnipeg a sample is taken from it and sent up to the Grain Exchange and the grain disposed of in that sample. Immediately after it has been disposed of, the railroad is notified and the car sent forward to its destination.

It is to be noted that the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning.

It is to be noted that the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning.

It is to be noted that the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning.

It is to be noted that the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning.

It is to be noted that the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning.

It is to be noted that the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning.

It is to be noted that the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning.

It is to be noted that the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning.

It is to be noted that the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning.

It is to be noted that the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning, the grain is to be sent to the Grain Exchange in the morning.

## Provision for Delinquency

Nation characteristics are suggested by this story.

A certain gentleman complained to three friends—an Englishman, a Scotchman, and an Irishman—that his servant broke a great deal of china.

The matter-of-fact Scotchman gave the sport bit of practical advice. "Dissolve it!"

Take it out of his wages, said the other two.

Objection to that course was made on the ground that the wages were less than the amount of the damage.

The Irishman at once came to the rescue with "This raises his wages."

A Real Test

Probably what the fuss in the schoolyard, boy.

The boy—why, the doctor has just been around examining us as one of the excellent boys is knocking 'th' cretinistic stuff out of a perfect kid—Cleveland Plain Dealer.

Many people think that ostrich farming is confined to south Africa, but it seems the bird thrives amazingly in New South Wales, although it is not so extensively bred there as at present some half-dozen ostrich farms in New South Wales and the experience gained proves that the bird thrives in the same environment on original type, due to the fact that the ostrich is a native of the South West of Africa.

What do you do during the summer months? Inquired York Ham.

## MOONEY'S BISCUITS

BISCUITS MUST BE FRESH TO BE PALATABLE

MOONEY'S BISCUITS ARE THE FRESH BISCUITS

Fresh enough to take the place of the bread and biscuits you bake yourself.

Because the MOONEY system is so perfect that every biscuit is shipped the same day it leaves the oven.

The big Winnipeg factory is so close that your grocer gets MOONEY'S in a few hours—no long haul—no deterioration.

Besides the demand for MOONEY'S—the popular biscuit—is so great that his stock is always changing.

MOONEY'S never grow stale on the grocer's shelves.

That's one reason why

MOONEY'S PERFECTION

SODA BISCUITS

are fresher, crisper and more appetizing.

Ask for the big package or a sealed tin and judge for yourself.

## New Species of Elephant

The old proverb, "Always something new from Africa," receives fresh illustration from the reported discovery that a new species of elephant. It is known to the natives as the "Kikuyu" elephant.

A herd of five of them was seen on the shore of Lake Leopold II, by one of the explorers sent by the British Museum of Natural History. Compared with the known elephants there is much smaller, with shorter trunk, longer necks and no tusks.

Before more minute examination was made the animals plucked into the lake. An account of this new discovery is given in La Nature.

Minard's Liniment, the Lubricant's Friend.

What He Wanted Him For

Mark Twain did not cherish fondness for the average office boy. He had an idea that the genus was the unfortunate, and invariably when humiliated walked into some business office where there were immediate and hostile to him and the boy.

One day Mark went to see a friend at his office, and the office boy on guard. In fact, when he came to see him, he was told to go to the office.

Mark mentioned his friend's name.

When you want to see him, said the office boy, go to the office.

Mark mentioned his friend's name.

When you want to see him, said the office boy, go to the office.

Mark mentioned his friend's name.

When you want to see him, said the office boy, go to the office.

Mark mentioned his friend's name.

## BIG THEATRICAL STARS

At the Walker Theatre During Winnipeg Exhibition

For the two weeks beginning July 1st, in which are the dates of the national Exhibition, July 1st to July 15th, the beautiful Walker Theatre will offer its patrons two very superior attractions.

The first will be the well-known comedienne, Henrietta Crossman, in her most successful play, "The Real Thing," and the second attraction will be "The Spring Maid," which, on Thursday, July 1st, will bring an engagement covering nine nights and three matinees.

Henrietta Crossman is one of the most dramatic and brilliant stars on the dramatic stage and her latest play, "The Real Thing," gives her an exceptional opportunity to display her talents.

Her role is that of a bright and fascinating woman who never has a sister from developing into a dowdy and a drudge.

Her little sister has left herself open for marriage and soon finds that her husband is seeking some other girl.

There is any amount of good, clean comedy in the story, and Miss Crossman is well adapted to bring it out in full force.

"The Spring Maid" is one of the best European and American light comedies ever produced.

It was presented in Winnipeg at the Walker Theatre early in the season last year, it scored tremendous success.

It is a delightful story, full of original ideas, its music is sparkling and haunting, particularly the songs "My Dream" and "The Spring Maid."

It is a lively stage. It will be presented at the Walker again during the exhibition.

It is a very good play, and it is a very good play, and it is a very good play.

It is a very good play, and it is a very good play, and it is a very good play.

It is a very good play, and it is a very good play, and it is a very good play.

It is a very good play, and it is a very good play, and it is a very good play.

He Misunderstood Orders

Mistakes made over the telephone are sometimes as humorous as they are serious. One tale involving the suburban woman and her husband.

You know, she said, I wanted to buy a couple of artificial eggs with him. We had provided for them. So I telephoned my husband to bring home a couple of artificial eggs with him.

Well, and didn't he? Didn't he? He brought home a pair of cork legs.

Ask for Minard's and Take no Other

Very Much Married

Waitress—Have another glass, sir? Husband—to his wife—Shall I have another glass, Friedrick? Wife—to her mother—Shall I have another mother?

A maid was brushing her mistress's hair when she mentioned that she had heard Miss Evans sing in the parlor the night before.

Oh, how did you like it? asked the mistress.

Well, answered the maid, it was beautiful. She sung just as if she was singing!

The Cut-Worm

Farmer of this season of the year should watch for the appearance of cut-worms, and should lose no time in ridding their fields of this pest immediately upon their appearance. The following remedy is recommended by several agricultural departments:

Paris green, dry, 1 pound. Sugar, 2 to 3 pounds. Mix thoroughly and dampen slightly with water and spread over the section where the worms appear.

Hon. Fries Ellison, minister of Finance and Agriculture of British Columbia, has accepted an invitation to address the great International Dry-Farming Congress in Lethbridge, Alberta, October 1st and 2nd.

He has notified the officers of the organization of his making every effort to attend, and to display a great number of fruits ever gathered in British Columbia, and to exhibit a large number of saws in Chicago and New York after the Dry-Farming Products Exposition at Lethbridge.

The possibilities of coal storage exportation of food from Manchuria for European consumption are indicated by the market prices showing that June sold orders for 50 cents a bushel, chick, deer for 7 cents and sheep for \$2.

Appropriate

Willie—Why do you call your mother a witch?

Willie—it is said to be the last word of the occultic construction.

Oil of Cedar Wood

The demand for oil of cedar is very limited in England. Consul General of the United States in London is principally in supplying. The price of oil of cedar in London is 14 to 16 cents per pound when handled in one dozen tons lots or more. The demand for cedar wood oil is said to be greater in France and Germany.

# CANADIAN LIVER PILLS

THE OLD PAINS AND ACHES ARE NOW ONLY A MEMORY

Tells of the Wonderful Benefits Obtained From

DR. CHASE'S

KIDNEY-LIVER PILLS

Lives many another Newfoundland-er living far from home. Mr. J. M. Kane has abundant gratitude for the benefits obtained from the use of Dr. Chase's Kidney-Liver Pills.

For years he had suffered from a congested condition of the liver and kidneys, with headaches, backaches, pains in limbs and body. He was able to describe his sufferings as well as the greatest he knows to express for the cure.

Mr. Alex J. Stone, West Point, N.S., writes:—I suppose you thought I had forgotten all about you when I got Dr. Chase's Kidney-Liver Pills, but I haven't. You must excuse my taking, for like many Newfoundlanders I have no high education, but I want to thank you many times for your medicines.

"I cannot tell you what I suffered from liver and kidney troubles. Indigestion and constipation, nor can I find words to express how much better this medicine has done me. I feel better than I have for five years and have given these pills to my friends, who tell me they have done them a wonderful amount of good. I want to express my heartfelt gratitude for the benefit derived from the great medicine."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 2 to 4 times a day. Sold by all druggists or by mail to E. M. Kane, Toronto.

Death Rattle of Alps

The number of fatalities due to mountain climbing in Switzerland has rapidly increased during the past year. According to an authentic compilation, ninety deaths were reported in climbing in the Swiss and Italian Alps during the year ended December 31, 1910. To the above figures must be added eighty serious accidents, five of which were fatal.

The causes of the accidents were ascertained by the Swiss Alpine Club. The causes of the accidents were ascertained by the Swiss Alpine Club. The causes of the accidents were ascertained by the Swiss Alpine Club.

Extermination of Rats and Mice If it were generally known that there is no trouble to rid a house of rats or of mice by the use of Gillette's Lysol, it is doubtful if the article could be made as fast as it would be used. The process consisted with using it is very simple. The process consisted with using it is very simple.

The plan is to work, trying, but the good anti-Gillette's Lysol should be procured. Refuse the many cheap imitations. Refuse the many cheap imitations.

The Most Ancient Map

After some controversy about the age of various maps that have come down to us from ancient times, it has been finally determined by savants that the oldest is a map of the world made in a Byzantine church at Naxos, in Palestine.

Pills for Nervous Troubles—The stomach is the centre of the nervous system, and when the stomach suffers healthy action the result is manifest in disturbances of the nerve. If allowed to persist, nervous debility, a dangerous ailment, may ensue. The first consideration is to restore the stomach to proper action, and there is no readier remedy for this than Farmer's Vegetable Pills. Thousands can attest the virtue of these pills in curing nervous disorders.

Wrong Guesses

That man has an idea that he understands women. He's a widower, I believe. "Nope," he's got any such idea as that he's a bachelor. "Nope," he's got any such idea as that he's a bachelor.

After the Baseball Strike

Pat (speaking from the grandstand)—Excuse me, Mr. Grandstander, but wouldn't it be better to have taken that ball on the nose than to have tried to get up on it? Player—No, I think not. As it happened, it was a home run. The third run came in, but I slipped slightly in getting away, so it was not at all of interest.

Fan—Thank you. You are very kind.

Player—The obligation is mine, sir. You are very helpful. The obligation is mine, sir. You are very helpful.

Both (bowing)—St. Louis Dispatch.

# CANADA'S COAL SUPPLY

Department of Mines Issues Report Dealing With Fuel Conditions

A report dealing with the coal resources of Canada has been issued by the Dominion Department of Mines. The estimates given are only based on what is known. In the western and northern regions which have been little explored there may be large deposits of which nothing whatever is known at present.

The official estimate of the coal resources of Canada is 75,000,000,000 tons of anthracite, 40,000,000,000 tons of bituminous coal, and 100,000,000,000 tons of lignite.

The deposits are distributed as follows: The Maritime provinces, 2,500,000,000 tons; the central and western, 30,000,000,000 tons; the northern, 100,000,000,000 tons; the western, 100,000,000,000 tons; the northern, 100,000,000,000 tons.

The quantity of coal now annually mined in Canada is about 12,000,000 tons. At this rate the coal resources of Canada will last for 14,575 years. If the coal demands of Canada will keep on increasing, but it will be a good many years before the quantity of coal now annually mined in Canada will be exhausted.

The present output of the United States is about 500,000,000 tons annually. It would take only 145 years to exhaust the estimated supply of coal and about 310 years to get to the coal resources of the United States.

Smith's Kitchen Utensils

A committee of experts recently visited the cutlery and kitchen utensils of the Shah of Persia at \$25,000,000. No other cutlery in the world, not even in Spain, has such an elaborate collection of valuable pieces.

Keen Minard's Liniment in the house. Underated the Language An Indianapolis public school teacher some time ago, she related a curious incident that took place in the Kentucky-Tennessee borderland.

Expected Something Better A Britisher of Kansas is so tall that when he plays golf he uses a special kind of club. He is so tall that when he plays golf he uses a special kind of club.

He told him when he got a number of letters from a girl who was on the right and told the other across, and he knew what I meant right away.

He took up the matter, and he was in the treatment of summer complaints the most effective remedy that can be given.

Some Rules That Help in Reading the Clouds and Winds

The following formula of weather signs was adopted by the Farmers' Club of the American Institute some years ago, and it has been found to give satisfaction.

When the temperature falls suddenly there is a storm forming south of you. The wind always blows from a region of fair weather toward a point where a storm is forming.

When the temperature falls suddenly there is a storm forming south of you. The wind always blows from a region of fair weather toward a point where a storm is forming.

For first class job printing try the Hustler.

The new jail looked pretty old to one or two the other night.

Miss Olive Mann has accepted a position at the C. C. ranch.

Mr. and Mrs. Geo. Walker are in from Reid Hill.

Miss Katherine Sullivan of High River is the guest of Mrs. D. M. Boyd.

The Rev. Mr. Carr acceptably occupied the Presbyterian pulpit last Sunday morning.

A number from here were up to see the "Clowns" last Thursday, and report a good time.

L. Stevens and family have returned from Victoria, B.C. Mr. Stevens is looking after his crops here.

J. W. Bradley conducted both the morning and evening service at the Nanton Baptist church last Sunday.

Cayley, with a picked up team, played Nanton a game of baseball last week. Score 5 to 3 in favor of Nanton.

Mr. H. C. Evers has taken the Imperial Elevator agency here. He intends residing in the James Anderson residence.

The camping party returned home from the hills on Friday evening, and report a very enjoyable holiday.

Weather during the past week has been very favorable towards ripening crops, most of the fall wheat is already cut. There is every prospect of spring wheat being a splendid crop. Oats are in a splendid condition. Barley harvesting has commenced in some localities, and large yield is expected.

We very much regret to announce the sudden death of Mr. Hager, which sad event occurred last Friday morning. For the past two weeks the deceased had been visiting friends in and around Cayley, and his untimely and sudden death will come as a painful surprise. How true it is, "That in the midst of life we are in death." His remains were sent to Okishona on Sunday morning for interment.

School days! School days!

Mr. and Mrs. Geo. Smith of Reid Hill were in town last week. Mr. Shaktelen has purchased the W. E. Walker property, east of the town.

P. Beiseigal, down from Steveville, reports crops well under hand up there.

Misses Capell and Allwood have returned from Banff. They report a very pleasant time.

Miss Lena Schochow of High River was the guest of Miss Margaret Robertson over Sunday.

Mr. Fitzpatrick returned on Friday from his vacation, in order to resume his duties as principal of the school.

The Sunday school picnic held last week at Wm. Walker's was a decided success. Owing to the weather conditions the rainbow social of the evening was not just what the ladies expected.

W. Milroy, who has been in the Bank of Hamilton for some time, was "sent down" to Nanton last week. He will be missed by his many friends here. Mr. Williams of Sask. takes his place in Cayley.

**How to be Healthy**

(By Uncle Walt)

Eschew the things you like best—the steaks and oyster fries, and swallow down your eager zest, the things that you despise. Fill up with greens and milk and bran and toasted Graham bread, and you will be healthy man, providing you're not dead. Health is the thing without a price—it surely is the goods, so read the sale and save advice of men like Hutchwood, and baffle yourself ten times a day in shredded gasoline, and eat three kinds of clover hay, and eat them while they're green. Be sure, and wear a cheese cloth suit when you're on the street, and have a screen door in each boot to ventilate your feet. Remember, water should be fried before it's fit to drink; if germs and microbes get inside, they'll put you on the blink. Engage a specialist you will to manure your teeth, and fumigate, with splendid skill, the hangdowns underneath. Decelerize your tainted wealth, wear medicated socks, and soon you'll have such perfect health they'll put you in a box.

**STAVELYTES VISIT TO FLORIDA**

Editor of Staveley Standard,

Dear Sir,—Some time since I conceived the idea of visiting Florida for my health's sake, and eventually to settle there, everything being O.K., and with that end in view I got in touch with a land syndicate, that sent me literature galore, dealing with the glories of Paradise No. 2. It would be putting it too mild to say that I was successfully vaccinated for the "simplest" of the strength of it. I accordingly shipped on the 5:20 a.m. train, nicknamed the "Spokane Flyer," on the morning of 27th June last and proceeded on my way to the sunny South.

Of course, being interested in agriculture I watched the country from start to finish, while daylight lasted. Immediately after leaving Macleod I was struck with the dried-out appearance of the country until nearing Moose Jaw. While moralizing, I thought of some of my Staveley friends who were anxious to sell out; just anxious they would be to buy in the same land had they but seen the country that I had then passed over. From Moose Jaw, on towards Portal, resembled, but did not excel, the Staveley district. Arrived at Portal 2 a.m. following and was catcalled as to where

we were born, where we were going, what we had for dinner, etc. I may here state that I understood that the customs officers on the U.S. side were a rude, boorish and offensively zealous lot, but, to my surprise, more courteous, gentlemanly staff of men I have never been my good fortune to meet. At daylight next morning, 29th, I opened eyes on one of the loveliest countries I ever beheld, N. Dakota. Beautiful houses with shade trees on three sides, excellent barns, plus well kept gardens. Next State, Wisconsin, also looked fine. Arrived in Chicago and remained there overnight, next day being Sunday. I struggled through a good deal, and saw and heard things, and, by the way, I found that one of the most valuable assets a traveller can possess is the music and words of "Casey Jones." It puts the tag of up-to-dateness on one more pronounced than the new fashioned suit with a base-ball shoved in the toe. I have reason for saying so. At noon that day, Sunday, I entered a respectable looking lunch room, where I hoped to enjoy a nice beef steak, but was disappointed, coming to a musical abomination that struck up a course comic song, with the refrain, "Arrah, come in out of the rain, Mister McKay." I am not a high grade Christian, but I certainly thought of the old Commandment that I learned in childhood, also of Canadians and their loyalty to the Sabbath. At last I got away from Chicago. It was almost dark, but I found on my return that I had passed through a magnificent State, Illinois. We were "going home" through this State, also Mississippi and Alabama, until we arrived at Birmingham, Ala., a true and correct reproduction of the old Birmingham the other side of the Atlantic. By the way, the soil of this State, Alabama, is not correctly described by calling it brick-red, as it would certainly rival an Irish setter. The country is a series of large knolls, with an area of five to ten acres in each knoll, decorated with miniature fences, from bottom to top like hoops on a barrel, the idea being to keep the land from washing away. Query, how would you like to work such land, and sing "Sweet Home," at the same time, men of Staveley? Next city of importance was Jacksonville, Fla. Here it was getting genuinely hot, and farther south, hotter. Here it was where the law of discrimination steps in and provides waiting rooms, cars and bars for the colored folk. I may remark that I inadvertently walked into a waiting room and soon had plenty of stove-polished female creatures sitting beside and in front of me, and recognizing a most "ransom" flavor—well, I drew my chance as quickly as was compatible with Northern decorum, and looking through the corner of one eye I noticed the notice, "Colored Waiting Room."

One hundred miles took me to my destination, Ocala, Fla., a pretty little town of about 5000 population. Everything was quiet no sound of hammer or trowel, no signs of progress. I am sure I looked and felt that I was the missing link, as I had a coat, vest trousers on, in contradistinction to those wearing only shirts and pants—no hat, that appendage being used as a fan. Well, I found my friends had gone on before me. No. 1, temperature 102; No. 2, very little less; and No. 3, with marked symptoms of that tropical disease known as "elephantiasis"—pleasant, eh? I recommended, in fact, ordered, an immediate start for the Woolly, as being our only salvation, and during the interval that elapsed in preparations, I went around some

in a naughtymobile. I found at least two-thirds of the country under water, the other third being sand, that gave way for a vehicle similar to the snow of Alberta. This the class of land available for agriculture, requiring, from its virginity, one ton of fertilizer to the acre at \$10.00 to \$40.00 per ton for your chance of obtaining a crop. I say chance, because heavy rain is four-fold a greater menace there than frost is in Western Canada. All concerned, while I was there, was howling about sun-bleed on crops. It even kills hens and chickens. I was creditably informed. I remarked already that a nice little town Ocala was, its leading feature being its foliage, palm trees, umbrellas trees, ragnite trees—with notes dropping on the sidewalks—not notes as you understand them, but shelled notes called bugs, about the size of a bat, and when they run, or rather fly, fowl of an electric light or limb of a tree, woe be to the man whose neck obstructs their downward excursion. I must not forget mentioning that during my peregrination in Florida I met many strange things and many strange things met me, too, to my cost, in the shape of insect pests. There were common mosquitoes, uncommon mosquitos, jiggers, and sanddoodlers. The uncommon mosquito comes into your dwelling after dark; in defence of all screens, and departs before daylight, totally unknown to his victim—after his departure you do some stunts, at least, I have. The jigger is almost invisible; it gets under the skin and lays its eggs there, and thereby supplies you with plenty of fun (?). The animals of the country seem to have been trained for attending funeral processions, their movements being of the any-time-at-all order. The cattle, especially, have very good reason for their deliberate movements as they are eaten alive with ticks, so much so, that they, or their flesh, are not permitted to enter the northern markets.

Mr. Editor, this a slight sketch of Florida for the education of those intending to go there, and should you be graciously disposed to give it reasonable circulation, I have no doubt but your guardian angel will at least keep track of one of your good deeds.

I am, Sir, yours,

NONDISCRIPT
